

# CHECK LIST

## ALTEC *FD\_COMPACT*

via e-mail to: [info@altec-metalltechnik.de](mailto:info@altec-metalltechnik.de)  
via fax to: +49 3663 4210-211

- ☐ Enquiry  
☐ Order (mark with a cross where applicable)

Name:

Address:

Post code/town:

Phone:

E-mail:

Project name:

### Location coordinates

Site:

District:

Post code:

### Ground category

☐ **Category 1**

Smooth, flat land  
without obstacles

☐ **Category 2**

Area with hedges,  
single farms, houses  
or trees

☐ **Category 3**

Suburbs, industrial  
areas, forests

☐ **Category 4**

City with at least 15 %  
of constructed surface  
with a height of 15 m

### Roof dimensions

a Height of construction:

m

b Width:

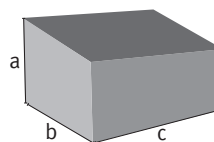

m

c Length:

m

Drainage slope:

°

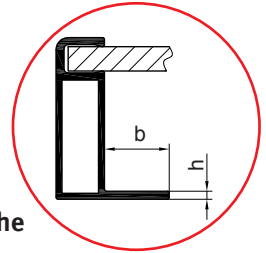

Shape of the roof:

Please enclose a separate sketch (fully dimensioned) when there is a complicated or a special geometry of the building.

## Modules

|                                   |         |     |         |                            |           |
|-----------------------------------|---------|-----|---------|----------------------------|-----------|
| Module type:                      |         |     |         | (Please attach datasheet!) |           |
| Module size:                      | Length: | mm  | Width:  | mm                         | Quantity: |
|                                   | Height: | mm  | Weight: | kg                         |           |
| Approximate size of the system:   |         | kWp |         |                            |           |
| Desired distance between modules: |         |     |         | mm                         |           |
| Clamping area::                   | b:      | mm  | h:      | mm                         |           |

**Please urgently note: The clamping area of 5–32 mm with a height of 1–3 mm at the bottom edge of the modules must be considered when choosing the module type.**

## Mounting system

|  |   |  |
|--|---|--|
| <input type="checkbox"/> east-west elevation       | <input type="checkbox"/> south facing elevation | Module arrangement: <b>only horizontal</b> |
| Desired number of module rows one above the other: |   |  |
| Desired number of module rows next to one other:   |   |  |

## Roof membrane

|   |  |
|---|--|
| Roofing material:   |  |
| Compressive strength and insulation for taking the mounting system is available |  |
| <input type="checkbox"/> yes  | <input type="checkbox"/> no, max. compressive stress |
| kPa   |  |

## Specific features

|   |   |                             |
|---|---|-----------------------------|
| Is there an attic?<br>(When giving the height, the max. value between surface and top edge is normative)                | <input type="checkbox"/> yes, max. height | mm                          |
|   | <input type="checkbox"/> no               |                             |
| (with the height of the parapet the biggest value is authoritative between surface layer and upper edge of the parapet) |   |                             |
| Are there windows?  | <input type="checkbox"/> yes              | <input type="checkbox"/> no |
| Are there chimneys?   | <input type="checkbox"/> yes              | <input type="checkbox"/> no |
| Are there fans?   | <input type="checkbox"/> yes              | <input type="checkbox"/> no |
| Is there smoke and heat venting? (state direction of vents)?  | <input type="checkbox"/> yes              | <input type="checkbox"/> no |
| Other:  |   |                             |

**If there are separate roof structures, please attach a fully dimensional sketch to your enquiry! When planning the module arrangement, please keep a rotary distance of 500 mm to the edge of the building.**

## Delivery address:

(if different from company address)
